1 UPGRADING FROM EARLIER VERSIONS

- To upgrade to version 3.1 please uninstall your existing version and install 3.1
- A new license key is required with this version – if you have current support and maintenance you can request a new license key from Aquaforest by email : sales@aquaforest.com.
- All existing command-line options are retained

If you have any questions about upgrading to version 3.1 please contact Aquaforest support : support@aquaforest.com

2 PLATFORM SUPPORT

Both 32-bit and 64-bit Windows versions of PDF Junction are available.

3 OUTLOOK .MSG FILES AND ATTACHMENTS

Direct support for converting Outlook .MSG files has been added. In addition an option is available to convert the email attachments so that the resulting PDF is composed of the email plus each page of each attachment.

Outlook 2007 is sufficient to allow this conversion on 32-bit systems but on 64-bit systems Outlook 2010 is required to convert .msg files.

4 OPEN OFFICE

Open Office formats are now supported. This requires presence of Open Office on the machine where PDF Junction is installed.

Furthermore, PDF Junction can now be configured to make use of Open Office to convert Microsoft Office documents rather than require Microsoft Office to be installed.

5 WEB OPTIMIZATION

An option has been added which will enable generated PDF files to be “Linearized” ie Web Optimized PDFs.

6 PDF/A

Support has been added for PDF/A-1b.

7 PDF/X

Support has been added for PDF/X-3 and PDF/X-1a.

8 LOGGED ON USER REQUIREMENT

The requirement for a user to be logged on to allow file conversion has been eliminated in this release.
