## 1 UPGRADING FROM EARLIER VERSIONS

- To upgrade to version 3.2 please uninstall your existing version and install 3.1
- Version 3.1 license keys are still valid for this version.
- All existing command-line options are retained

If you have any questions about upgrading to version 3.2 please contact Aquaforest support: [support@aquaforest.com](mailto:support@aquaforest.com)

## 2 PLATFORM SUPPORT

Both 32-bit and 64-bit Windows versions of PDF Junction are available.

## 3 MORE STABLE CONVERSIONS

This version of PDF Junction has proven to deal with convert Microsoft Office documents and fonts better than version 3.1. There are also more options available in the configuration file which gives the user more choices.

## 4 LOGGED ON USER REQUIREMENT

The requirement for a user to be logged on to allow file conversion was eliminated in the previous release for Microsoft Word Documents only, this release will eliminate this requirement for XLS/XLSX, PUB, VSD, and PPT/PPTX documents.

## 5 EXTRA CONFIGURATION OPTION OPTIONS

We have provided extra configuration options in the topdf.exe.config file. This helps the user to achieve both section 3 and 4 above. Some of the new options still convert the same file types but they perform these actions in a different there by providing a more flexible approach to file conversion.

Below is a table showing the new options.

Extension	Use
<add key="AutoExtensionEx" value="" />	This option automatically converts any Microsoft office Document. An interactive user is not needed to be logged on to the server.
<add key="AutoExtensionOpenNative" value="" />	This option needs open office to be installed for it to work. It handles the same file types as the OpenOfficeExtension option, but performs the conversion differently.
