2.3 Send Mail Feature

The send mail feature did not behave as designed, this has been resolved in this release.

2.4 Performance Issue when saving to PDF on some platforms

A performance issue has been addressed when generating PDF files.

2.5 Configurable Log File Location

The log file location can be configured by setting the value in the variable `ts_log_file` in `config.inc`.

2.6 Annotations Issue

Annotations were moving from page x to page 1, this has been resolved in this release.

2.7 Download TIFF File

Users can now download the source TIFF file, in order to achieve the variable `menu_download_tiff` needs to be set to true in the `config_ui.inc`.
