PDF Junction 3.3 Release Notes

Version 3.3 – May 2014

© Copyright 2001 - 2014 Aquaforest Limited

<http://www.aquaforest.com/>

1 UPGRADING FROM AN EARLIER VERSION

- This release requires version 4.0 of the .NET framework. The setup will check whether this is installed on your system and if not, will take you to the appropriate Microsoft site to download and install .NET 4.0.
- To upgrade from earlier versions, request a new license key from Aquaforest:
sales@aquaforest.com

If you have any questions about upgrading to version 3.3 please contact Aquaforest support:
support@aquaforest.com

New features introduced in version 3.3 are listed below.

2 .NET APPLICATION

- PDF Junction has been converted from a mixture of Java, C# and C++ to a full .Net application.

3 SUPPORT FOR PDF/A OUTPUT

- PDF/A generation has now been integrated into the relevant steps.

4 ADDING BOOKMARK USING FILENAME

- When merging PDF files a new feature is now available which enables users to add Bookmarks in the output PDF using the filenames of those PDFs which have been merged.

5 GRAPHICAL USER INTERFACE

- This version sees the introduction of the New Metro style User Interface.

6 AUTOMATION OF TOPDF.EXE.CONFIG

- In previous versions, users had to manually modify the configuration file “topdf.exe.config” in order to convert challenging documents - this has now been automated.
